**CLAIM LISTING:**

The claims currently pending read as follows:

1. (Original) A method of previewing a graphical image corresponding to an icon in a clipboard, comprising:  
receiving an icon preview instruction from a user; and  
displaying the graphical image associated with the icon in response to the icon preview instruction.
2. (Original) The method of claim 1 wherein receiving an icon preview instruction comprises determining whether a display position indicator is positioned over the icon displayed in the clipboard for a predetermined time period.
3. (Original) The method of claim 1 wherein displaying the graphical image comprises displaying a reduced image of the graphical image.
4. (Original) A method of displaying a clipboard comprising:  
receiving a paste command;  
determining whether a plurality of objects are stored within the clipboard in response to the paste command; and  
displaying the clipboard adjacent a display position indicator, if it is determined a plurality of objects are within the clipboard.
5. (Original) The method of claim 4 wherein displaying the clipboard adjacent the display position indicator comprises positioning an icon associated with a last pasted object adjacent the display position indicator.

6. (Original) The method of claim 4 further comprising:  
hiding the clipboard in response to selecting an icon corresponding to an image stored  
on a clipboard.

7. (Original) The method of claim 4 further comprising:  
hiding the clipboard in response to moving position indicator so that the position  
indicator is not adjacent to the clipboard.

A 1  
8. (Original) The method of claim 4 further comprising:  
hiding the clipboard in response to selecting a close icon on the clipboard.

9. (Original) Computer usable medium including a program for previewing a  
graphical image corresponding to an icon in a clipboard, comprising:  
computer readable code for receiving an icon preview instruction from a user;  
and  
computer readable code for displaying the graphical image associated with the  
icon in response to the icon preview instruction.

10. (Original) The computer usable medium of claim 9 wherein receiving an icon  
preview instruction comprises determining whether a display position indicator is positioned  
over the icon displayed in the clipboard for a predetermined time period.

11. (Original) The computer usable medium of claim 9 wherein displaying the  
graphical image comprises displaying a reduced image of the graphical image.

12. (Original) Computer usable medium including a program for displaying a clipboard comprising:

computer readable code for receiving a paste command;  
computer readable code for determining whether a plurality of objects are stored within the clipboard in response to the paste command; and  
computer readable code for displaying the clipboard adjacent a display position indicator, if it is determined a plurality of objects are within the clipboard.

A 1  
13. (Original) The computer usable medium of claim 12 wherein displaying the clipboard adjacent the display position indicator comprises positioning an icon associated with a last pasted paste-able object adjacent the display position indicator.

14. (Original) The computer usable medium of claim 12 further comprising:  
hiding the clipboard in response to selecting an icon corresponding to an image stored on a clipboard.

15. (Original) The computer usable medium of claim 12 further comprising:  
hiding the clipboard in response to moving position indicator so that the position indicator is not adjacent to the clipboard.

16. (Original) The computer usable medium of claim 12 further comprising:  
hiding the clipboard in response to selecting a close icon on the clipboard.
